

Sia

Agentic AI for Data Analytics

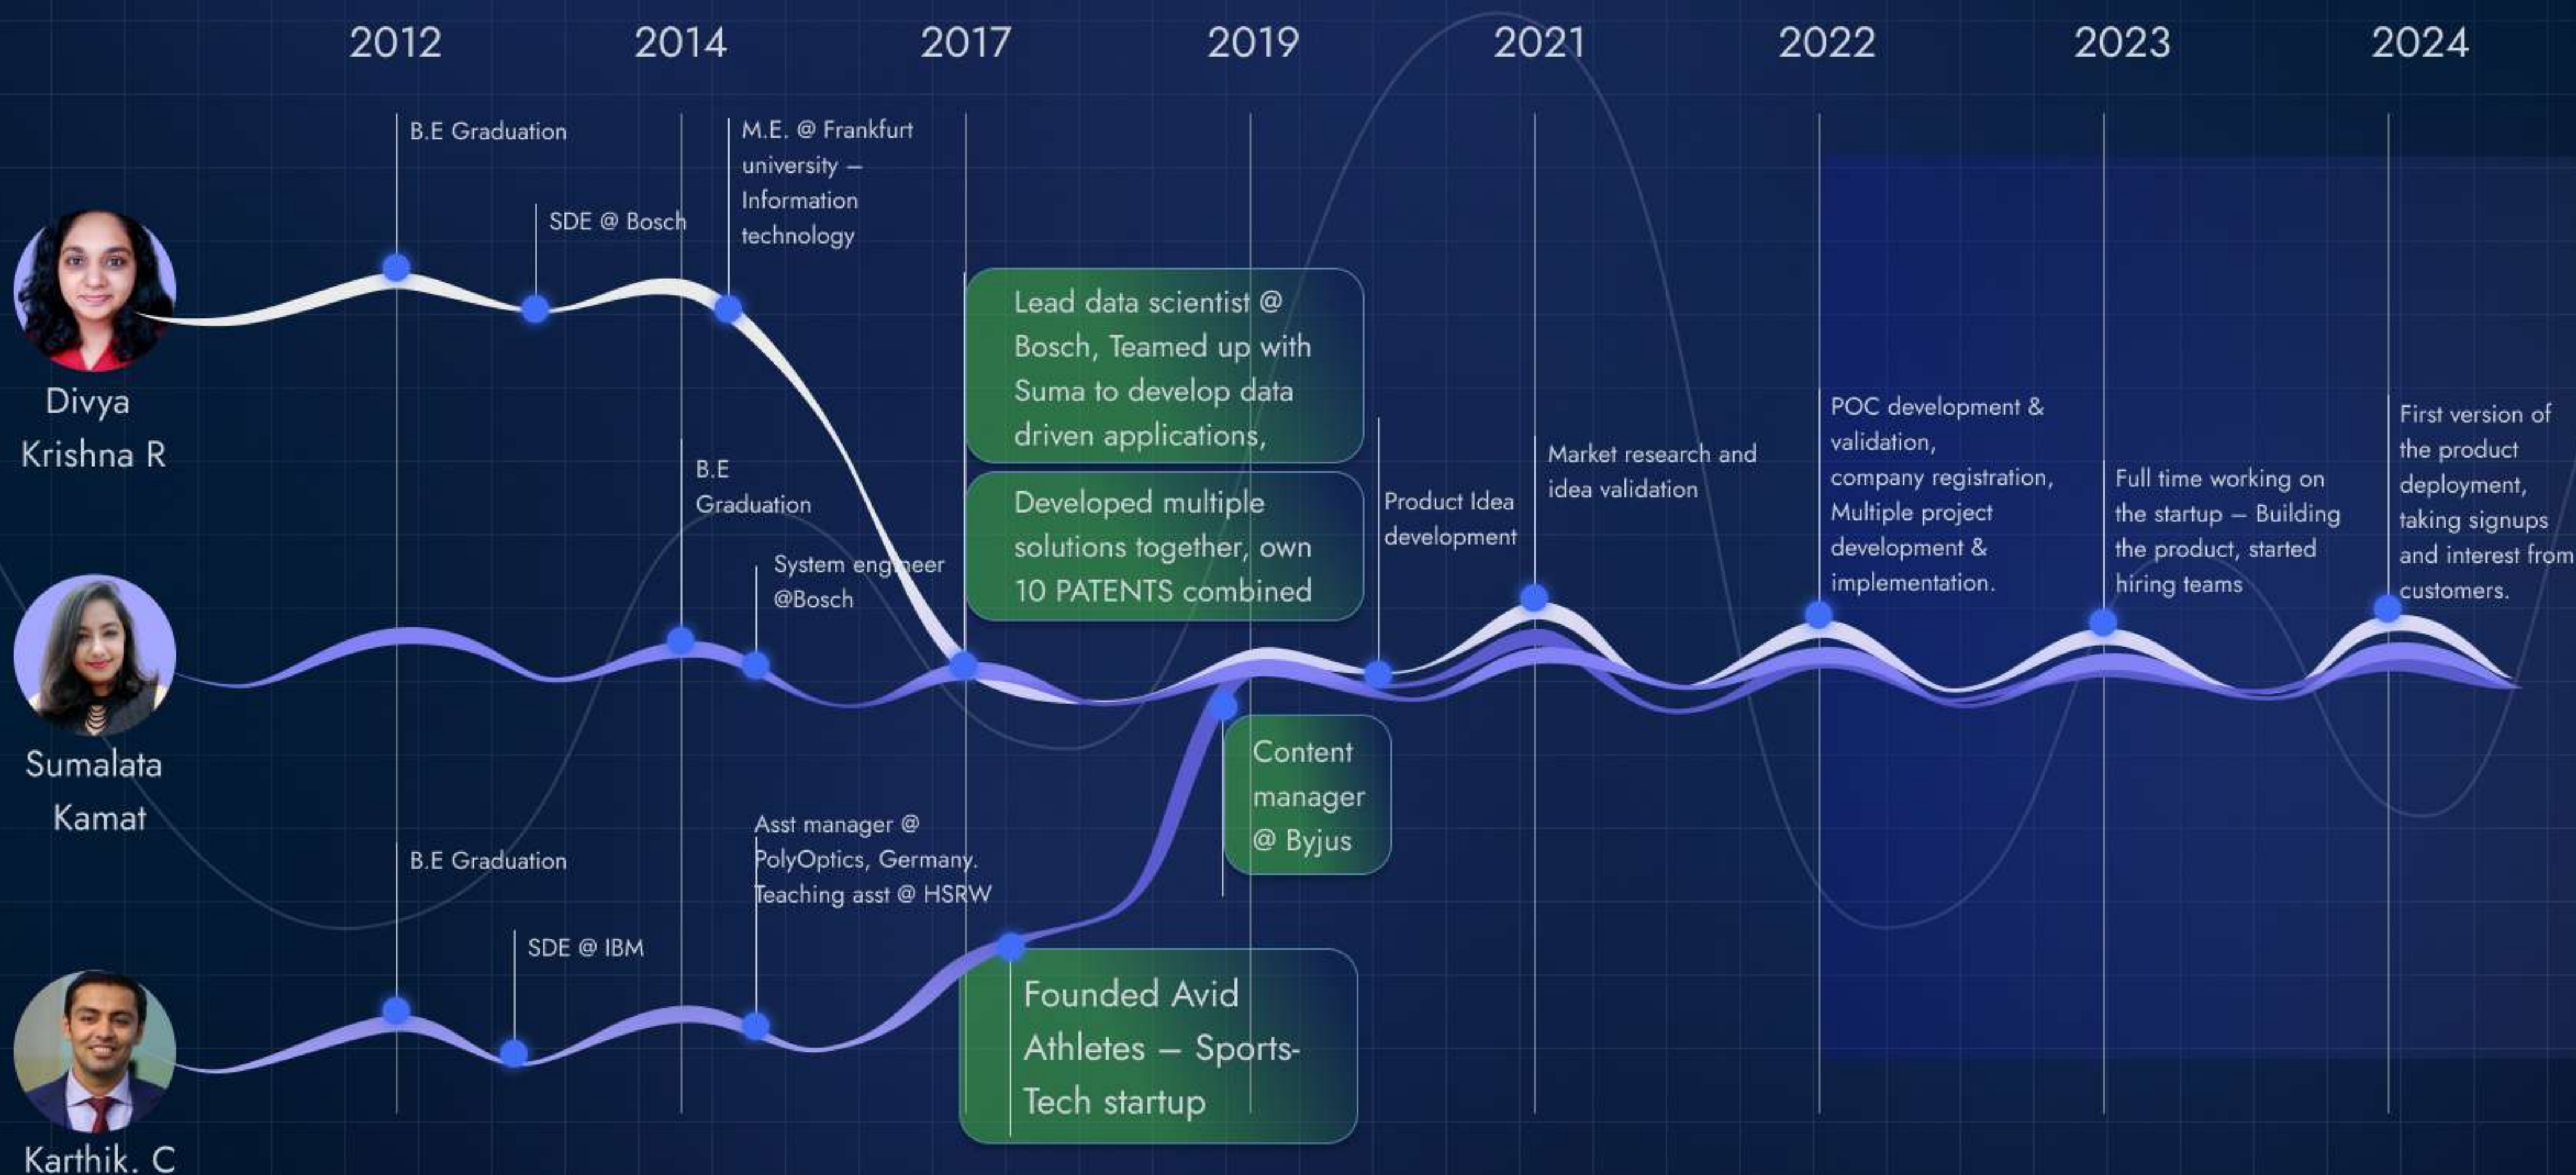

Drive value with Data from a conversation

Founding team & Journey

Cohesive team, together for over 8 years, First hand experience of the problem, Combining Data & Domain expertise.

The AI Crisis

State of Enterprise AI Adoption

90%

AI Projects Fail

76%

Decisions made
through Spreadsheets

68%

Data is not used
and remains in
data silos

500%

Increase in volume of
data generated over
the past decade

This is because of

High cost of
data analytics

Dependency on
Manual expertise

Fragmented
data pipelines

Source:

- Gartner
- Pnewswire
- IBM Research

The Cause?

Organizations depend on a centralized data team, making the pipeline fragile.

How Sia helps?

Sia brings a full data team to everyone across the organization through a
Simple Chat Interface
